

SATELLITE 2008:

Applications for communications via satellite continue to grow five decades after Sputnik. From global broadcasting and telephony to satellite-based backup networks for corporate, government, and other telecom grids, satellite solutions are reinforcing their importance in traditional services while innovating in others. Mobile voice and video communications, satellite services across continents, decreasing costs for hardware and equipment, creative strategic alliances between space segment providers and terrestrial networks . . . all point to a robust commercial, military, enterprise and new uses space-based architecture poised for robust and profitable expansion a half century after Sputnik.

The annual SATELLITE Conference and Exhibition assembles 8,500 delegates representing more than 65 countries, 270 exhibiting companies and a full conference program led by more than 300 experts, thought leaders and top-level executives.

Exhibition

The SATELLITE 2008 Exhibition features manufacturers, distributors, operators, integrators and suppliers of satellite-enabled communications. Among the product offerings are: broadband technology, digital broadcasting, teleport engineering equipment, IP networking services, microwave and RF, reception equipment and antennas, telecommunications carriers, transmission services and VOIP solutions. Plus, the Center for Global Commerce, open exclusively to international delegates, is located on the exhibit show floor to help you with all your exporting and purchasing needs. To learn more and search for exhibitors by products offered, visit www.SATELLITE2008.com/exhibition.

Conference

SATELLITE 2008 is the only event that provides practical advice, innovative insights, market research and new contacts to grow your business. Plus, every conference attendee receives digital conference proceedings (a \$500 value—FREE)!

Highlights of the SATELLITE 2008 Conference include:

- Focused Forums on broadcast, enterprise, emerging services, defense, homeland security, emergency response, commercial and mobile applications.
- New Mobile Satellite Services Forum with sessions on Comms on the Move, ATC and MSS CEO Roundtable.
- For the complete program, visit www.SATELLITE2008.com/conference.

Networking

All International Delegates are invited to attend the Welcome Reception on the 25th of February, 2008. This social event is the best way to network with colleagues, old and new, within the satellite-enabled communications marketplace. The networking continues throughout the week with *Via Satellite's* Satellite Executive of the Year Luncheon and Reception, the Society of Satellite Professionals Gala, and much more!
